

M.Talha Qureshi

AI/ML Engineer | Python Developer | Full-Stack Developer
Phone: 0324-1274346 | 0332-7400097 | Email: iamtalhaqureshi849@gmail.com
GitHub: TalhaQureshi324 | LinkedIn: Muhammad Talha

Professional Summary

Results-driven AI/ML Engineer and Python Developer with experience building intelligent software systems, scalable backend applications, deep learning solutions, REST APIs and automation pipelines. Skilled in computer vision, NLP, explainable AI and full-stack development using modern Python frameworks.

Technical Skills

- **AI/ML:** PyTorch, TensorFlow, Scikit-learn, Hugging Face, OpenAI API, CNNs, LSTMs, ViT, LIME
- **CV & NLP:** OpenCV, spaCy, NLTK, Deepfake Detection
- **Backend:** FastAPI, Django, REST APIs, Node.js
- **Frameworks:** Flutter, Firebase, Supabase
- **Languages:** Python, C++, SQL, Dart
- **Tools:** Git, GitHub, Docker, Linux

Professional Experience

AI Automation & Full-Stack Developer

Intellimind

Remote
Feb 2026–Present

- Built AI automation solutions, backend services and FastAPI pipelines.
- Developed NLP-driven assistants and automated business workflows.

Python Developer

Galaxy Solutions

Lahore, Pakistan
Mar 2025–Jul 2025

- Developed scalable Python backend applications and automation tools.
- Designed REST APIs, optimized SQL queries and collaborated on production software.

Python Developer (AI Domain)

Code Alpha

Remote
Mar 2025–Jun 2025

- Built NLP pipelines, chatbot modules and reusable ML components.

Technical Speaker & AI Mentor

Dev Weekends

Lahore, PK
2025 – Present

- Delivered ML and backend engineering workshops to 50+ developers, guiding student teams from initial product ideation through full project delivery.

Featured Projects

Explainable DeepFake Detection Platform — *PyTorch, Xception-LSTM, OpenCV, LIME*

- Hybrid Xception-LSTM deepfake detector with explainable AI.

Comparative Study of NLP Solvers on Multi-Agent Safe Navigation — *Python*

- Benchmarked optimization solvers for safe multi-agent navigation.

Task Forge – Jira Clone — *Python*

- Modular JIRA-inspired project management platform.

Food Demand Forecasting Using LSTM — *PyTorch*

- LSTM forecasting pipeline with feature engineering.

AI News Aggregation & Bias Detection System — *Transformers, spaCy, NLTK, LLMs, NewsAPI*

- Architected an NLP pipeline aggregating 15+ global outlets and applied LLM-based summarization with strict source attribution.
- Engineered a custom bias/sentiment analysis engine to quantify political polarization and detect media framing.

Education

B.Sc. Computer Science, Information Technology University (2022–Present)

Certifications

Advanced Python Programming - NAVTTC (2025), C++ Nanodegree - Udacity (2024), ITEC-UET Lahore (2025), Code Rush Hackathon (2026).
